Machine Learning
Project-Phase 5

In this phase we will compare our methodology and improve it.

1) **Methodology**
   a) Ensure that your methodology fills a gap and solves a problem.
   b) After looking at recent work in the field if you feel your methdology lacks something than improve it in a new notebook.

Note:
How to ensure that your methodology fills a gap and solves a problem?

1) Download five latest (2022 or onwards) research papers from good journals relevant to your project.
2) Compare them with your work. Mention in a Google docs document what they have done and what you have done.
3) Justify that your work fills a gap which other's work has not done or mention how your work is better than their in solving the problem. Tell what is unique about your work.
4) Give references of research papers inside your text (e.g --- [1] ---- [2]). Give url of the the research paper as references at the end of your notebook (e.g [1] https://abc.com/ppr [2] https://xyz.com/ppr2).

Best Wishes
